

651 RED LINE

High precision quick-change applicator for small cross-sections

Crimping tool for precision requirements. The 651 RED Line is based on the fundamental design of the High Runner 951 Global Star. It is made from high-strength aluminum and includes our proven pneumatic feed system. To meet the highest standards, we have extended the guiding of the applicator ram, using an MV guide. The table can be accurately adjusted via a scale line. Locking screws for adjusting the terminal feed with increments of 0.1 mm, combined with continuous fine feed adjustment in the scale range of 0.025 mm, enable precise crimping results. Milled contact guide rails ensure smooth feed. The entire feed block has been revised with new guiding and sealing elements.

Technical data

Wire cross-section: 0,08 – 2,50 mm²

Feed system: Pneumatic, adjustable

Feed length: 0 – 20 mm

Shut height at: 135,78 mm

Stroke: 40 – 44 mm

Compressed air connection: 5 – 8 bar

Weight: 4 kg

Dimensions (W x D x H): 180 x 100 x 150 mm
